

Introduction

In the modern IT industry, assisting users requires efficiency and accuracy. Remote support tools have been a key component of a successful Support group for decades, and while the principles remain the same, features, reliability and usability have greatly improved. When starting at a company, it is more than likely these standards and procedures will have already been developed. There are many remote support tool options available, with many features and price points. They aren't exclusively remote CONTROL and can manage software installations, asset management, and various protections.

Part 1 - User Documentation

Description

With your Selection of REMOTE SUPPORT tool, consider the following: You work for a Managed Service Provider who supports multiple clients for their IT needs. They can call in and request assistance with a wide variety of issues. Your current means of using ZOOM meetings for remote assistance are proving costly, but also rather cumbersome and hacky. Not to mention, there have been security and privacy breaches with ZOOM in the past. Since you have picked your new product in Part 1 above, you are now to write a QUICK START guide that shows step by step instructions on how to use the REMOTE TOOL on their side.

Expectations

- Create a QUICK START guide for your REMOTE CONTROL SOFTWARE
- Must have minimum 5 screenshots /10
- Must have concise instructions to accompany all screenshots. /10
- Must have links to the tool. If you can't find a direct link, just link to the company's page. /5
- **Include a common issue section with a minimum of 3 common issues or FAQs** /10
- Grammar and sentences must make sense. /5 (I take away 1 per occurrence)

Part 2 – JIRA Ticket /5

You are to **CREATE** a JIRA ticket recording the “ask” of this assignment. This means that you are expected to have a ticket with the following:

- A Summary outlining in 1 quick sentence what Part 1 of this assignment is about /1
- A Description (details) describing in MORE detail what is being asked, **WITHOUT** copy-pasting the contents of Part 1 in it. /1
- Assign it to yourself /1
- Have an Assignment3 LABEL on the ticket /0.5
- Have me as a reporter (make sure you pick the right me) /0.5
- Status/Close/Resolve the ticket as expected with a response to user /1

Remember to check Assignment 3 – verification queue.

Submission Guidelines

To be completed in one document, WORD or PDF accepted. NO ZIP FILES. **DO NOT PASTE DOCUMENT ONTO JIRA TICKET. INCLUDE JIRA LINK IN DC CONNECT SUBMISSION COMMENT FIELD**

See the very brief example below; **do not copy this identically**. You can have more or less steps so long as they describe everything needed. I expect slightly more effort in your common issues section (i.e. network issues). Maybe describe BRIEFLY how to check like going to a normally working website or two.

Banana Peeling Quick Start Guide (Example Documentation)

At bananacorp, we use only the freshest of bananas. There are times where we need to get to the yummy insides as fast as we can.

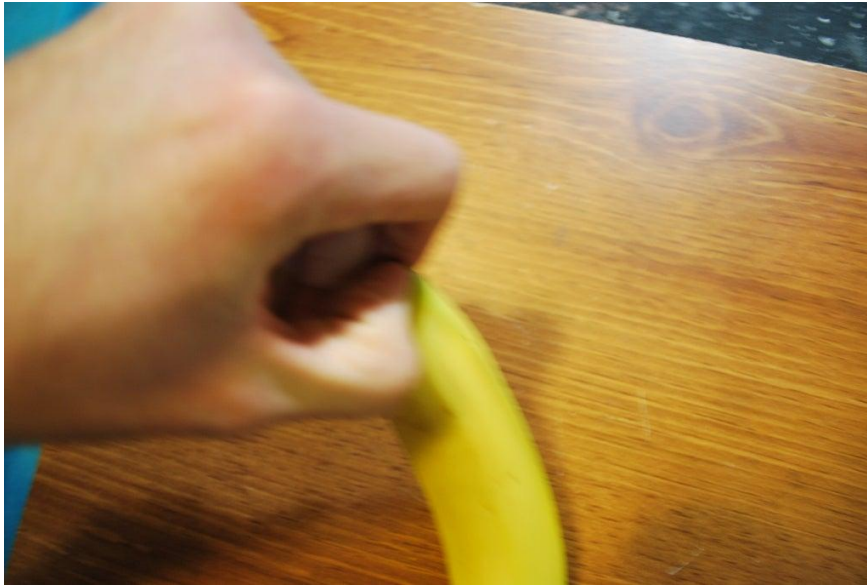

Step 1

Locate the Top of the banana

Step 2

Pinch the top off

Step 3

Peel bananas, peel bananas. Peel Bananas some more, and peel peel bananas.

Step 4

Chop Bananas. Chop Chop Bananas. Chop Bananas some more and chop chop bananas.

Step 5

Mash Bananas. Mash Mash Bananas. Mash Bananas. Mash Mash Bananas.

Step 6

Eat Bananas Eat Eat Bananas. Eat Bananas. Eat Eat Bananas.

Step 7

GO BANANAS GO GO BANANAS!!! GO BANANAS GO GO BANANAS!!!

Common Issues

- 1) Is your banana green? This usually means it needs more time to ripen
- 2) Is your Banana Black? This usually means it had too much time to ripen. Please get a new banana.
- 3) Is your Banana a cucumber? This means that you have the wrong fruit. Get a Banana
- 4) Are bananas yummy? Yes.
